What is “English for Academic Purposes (EAP)”?

“EAP is usually defined as teaching English with the aim of assisting learners’ to study and research in that language”
(Hyland, 2006)

“EAP is the English that is taught to second-/third-language students preparing to enter undergraduate and postgraduate courses at universities and other institutions of higher education.”
(McCarter & Jakes, 2009)
What should EAP be in the context of German higher education?

Mediation

CEFR
“In mediation, the user/learner acts as a social agent who creates bridges and helps to construct or convey meaning, sometimes within the same language, sometimes from one language to another (cross-linguistic mediation).

The focus is on the role of language in processes like creating the space and conditions for communicating and/or learning, collaborating to construct new meaning, encouraging others to construct or understand new meaning, and passing on new information in an appropriate form. The context can be social, pedagogic, cultural, linguistic or professional.”

(CEFR, 2018, p. 103)

Can act effectively as a mediator, helping to maintain positive interaction by interpreting different perspectives, managing ambiguity, anticipating misunderstandings and intervening diplomatically in order to redirect talk. Can build on different contributions to a discussion, stimulating reasoning with a series of questions. Can convey clearly and fluently in well-structured language the significant ideas in long, complex texts, whether or not they relate to his/her own fields of interest, including evaluative aspects and most nuances.

Resources and Support

Writing support:

- bring laptops to class
- students can use Etherpad on Moodle, to co-write simultaneously, both in class and at home
- use Moodle and WhatsApp for out-of-class communication
Resources and Support

Text, meta-language and genre analysis:
- show sample literature reviews and group presentations (YouTube)
- look for meta-language ie. explicitness/transition phrases etc.
- raise genre awareness ie. structural & lexical similarities, register constraints etc.
